Inspection Comment

This highway mnaintenance/police/water & sewer maintenance facility contains five elongated floor drains and seven stormwater drains. Highway superintendent indicated floor drains receive vehicle runoff and truck wash wastewater (no servicing perfomed in police department-two floor drains), while storm drains receive only rain/snow runoff. He indicated floor drains lead into manhole, then into highway ditch, while storm drains lead directly into same ditch. Superintendent indicated water is supplied by the county and sanitary waste leads into sanitary sewer (25 employees).
